

COMPANY PROFILE & PORTFOLIO

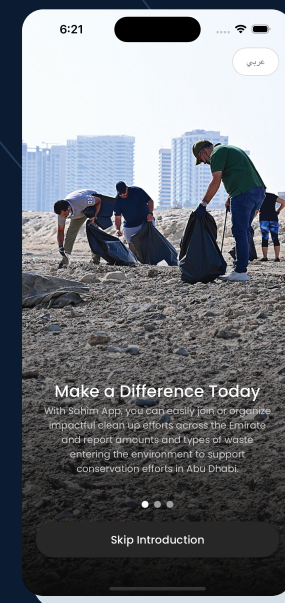

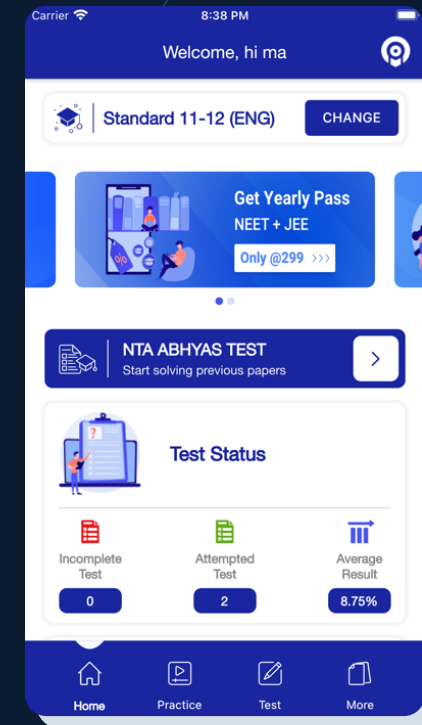

Ideas become exceptional mobile products.

Flutter expertise. Thoughtful design.
A clear path from concept to launch.

FLUTTER MOBILE DEVELOPMENT

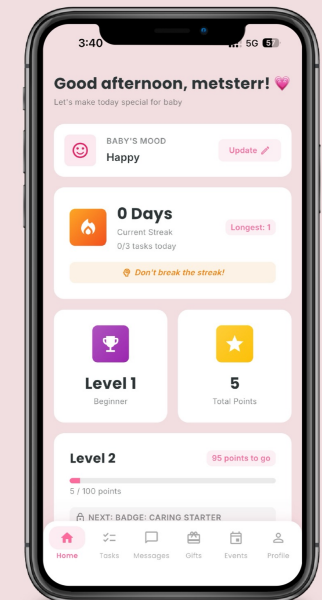

06 Featured projects

01 Technology focus

Love, Simplified Every Day

Tasks, Messages & Gifts - all in one place

SELECTED FLUTTER WORK

Across education, utilities,
environment, commerce and
everyday life.

Built around your product.

An India-based development team for businesses that want to turn a useful idea into a well-crafted digital experience.

We are Clonosys Infotech.

We bring mobile development, frontend and backend engineering, and UI/UX design together to help businesses create and improve digital products.

Our team includes developers with 8+ years of industry experience. We combine that experience with a practical approach to requirements, implementation, collaboration and ongoing improvements.

OUR MOBILE FOCUS

Flutter.

One framework. Multiple product experiences.

The six projects in this portfolio were built with Flutter and reflect our team's mobile application experience.

Product understanding

Start with the real user need.

Collaborative delivery

Keep decisions and progress visible.

Long-term thinking

Plan for maintenance and iteration.

02 / WHAT WE DO

From first screen to future releases.

Choose a complete product engagement or focused support for an existing application.

01

Flutter mobile apps

Android and iOS experiences, reusable interfaces, state management and API-connected workflows.

02

UI/UX design

User flows, wireframes, visual design and prototypes shaped around your brand and user needs.

03

Backend & integrations

Backend services, REST APIs, authentication, databases and third-party service integration.

04

Web & admin panels

Web experiences and operational dashboards to manage users, content and business workflows.

05

App modernisation

Feature enhancements, bug fixes, interface improvements and performance-focused refinement.

06

Launch & ongoing support

Release preparation, store-submission support, production issue resolution and planned updates.

ENGAGEMENT OPTIONS

New product development / Dedicated development support / Maintenance & improvements

03 / SELECTED EXPERIENCE

Six apps. Different real-world needs.

Explore the product range, then view each dedicated project page. All six projects use Flutter.

05

SAHIM - Abu Dhabi

Environment & citizen science

Android + iOS

06

ScreenPad

Productivity & connected devices

Android

07

Prober - NEET GUJ

Education & exam preparation

Android + iOS

08

GoEats

Food ordering & delivery

Android

09

Neveon: Machinery Crews

Workforce registration & referrals

Android

10

Pookie4U

Lifestyle & relationship engagement

Android + iOS

ENVIRONMENT & CITIZEN SCIENCE

SAHIM - Abu Dhabi

Small actions. Shared environmental insight.

A citizen-science app that helps Abu Dhabi residents record beach waste and contribute observations to the Environment Agency - Abu Dhabi.

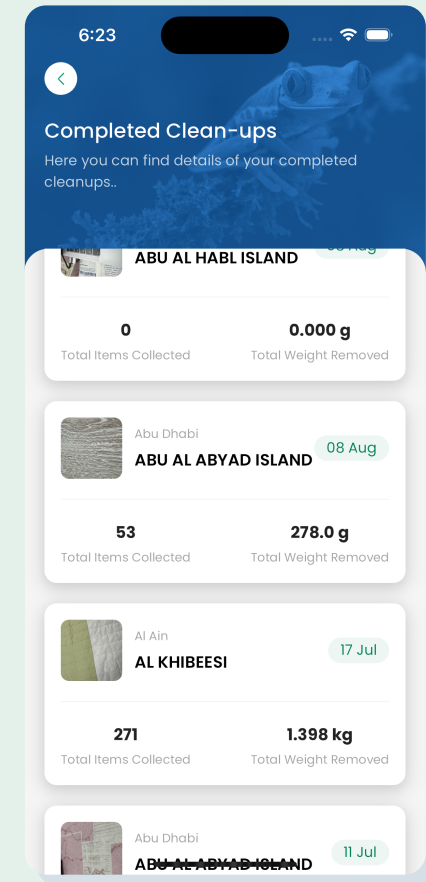

- Capture local findings**
Categorise, record and upload plastic and other waste found along the coastline.
- Support environmental research**
Share observations that can inform research, policy decisions and recommendations.

PURPOSE

Make community participation in environmental monitoring accessible through a mobile app.

Community participation

PRODUCTIVITY & CONNECTED DEVICES

ScreenPad

Your computer. Controlled from your phone.

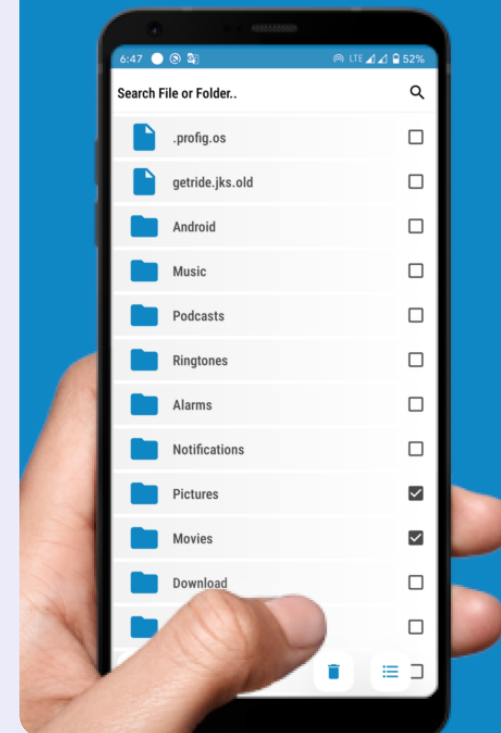

ScreenPad turns an Android phone into a remote controller for a computer, bringing everyday desktop actions into a mobile interface.

- Control and navigate**
Wireless mouse, keyboard, trackpad, gestures and system shortcuts.
- Connect devices**
Screen casting, mirroring and file transfer, with Wi-Fi or USB tethering connectivity.

PURPOSE

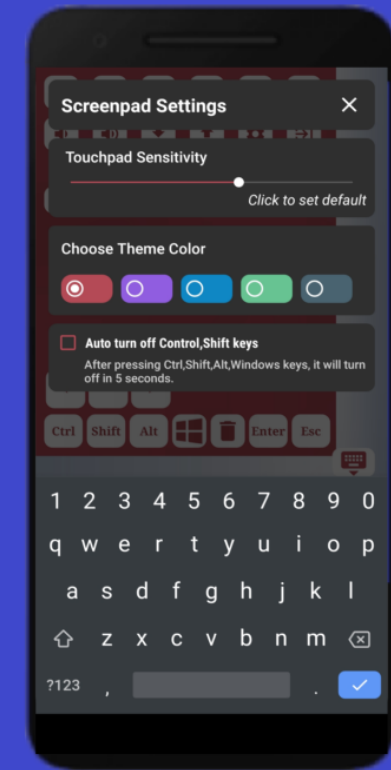

Bring navigation, desktop controls and file movement together in one mobile utility.

Transfer files in one Touch!!
from phone to computer and vice-versa.

EDUCATION & EXAM PREPARATION

Prober - NEET GUJ

Practice with purpose. Prepare with clarity.

A learning and assessment app for NEET and JEE preparation, with Gujarati-language NTA Abhyas tests and tools for structured revision.

Build a focused practice routine

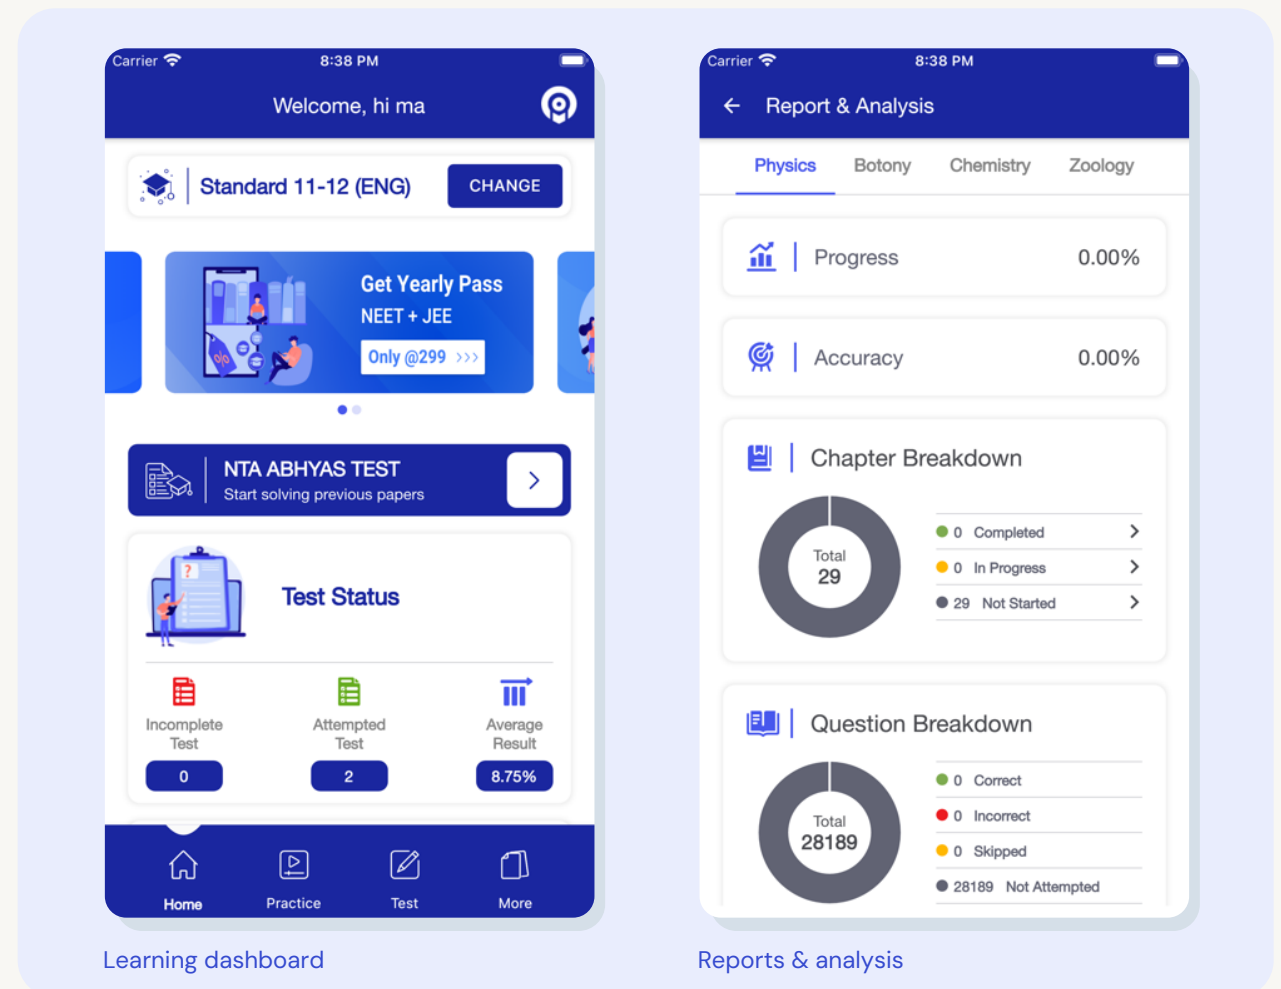

Chapter-wise MCQs, explanations, mock tests and custom papers with selected topics and timing.

Understand learning progress

Subject and chapter reports help learners review strengths, weaknesses and cumulative progress.

PURPOSE

Connect question practice, customised assessment and performance review in a single learning journey.

FOOD ORDERING & DELIVERY

GoEats

Local restaurants. A simpler way to order.

A food-ordering app connecting customers with restaurants in Jhumri Telaiya and nearby areas. The supplied Grizapp package is currently listed as GoEats.

Discover and order

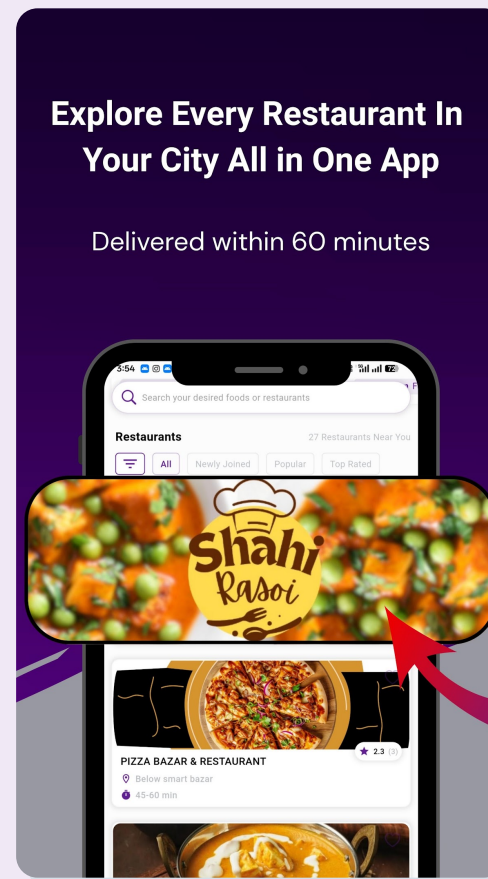

Browse local restaurants and food options, with offers and discounts available in the app.

Follow the order journey

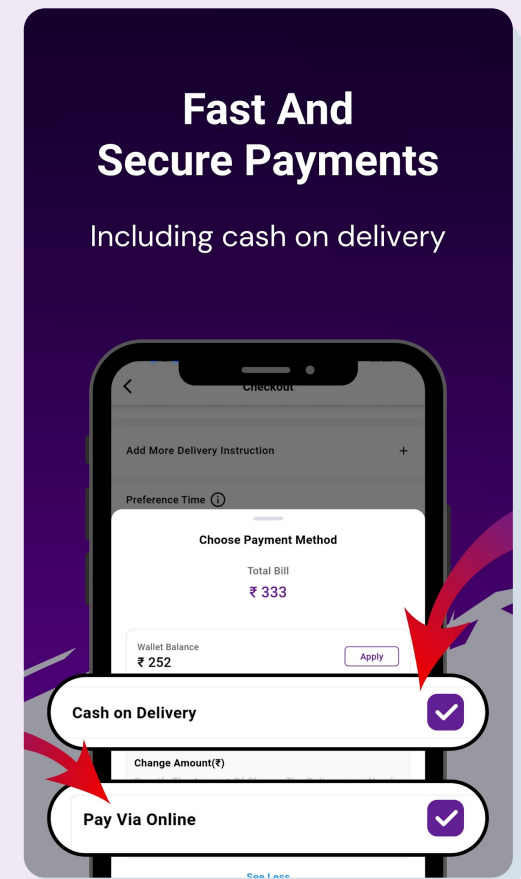

Live order tracking and payment choices including UPI, cards, wallets and cash on delivery.

PURPOSE

Give customers a convenient mobile path from discovering a meal to following its delivery.

Flutter

WORKFORCE REGISTRATION & REFERRALS

Neveon: Machinery Crews

Skilled people. Connected opportunities.

Neveon helps workers register for opportunities, manage their profiles and share referral codes with their network.

Simplify worker onboarding

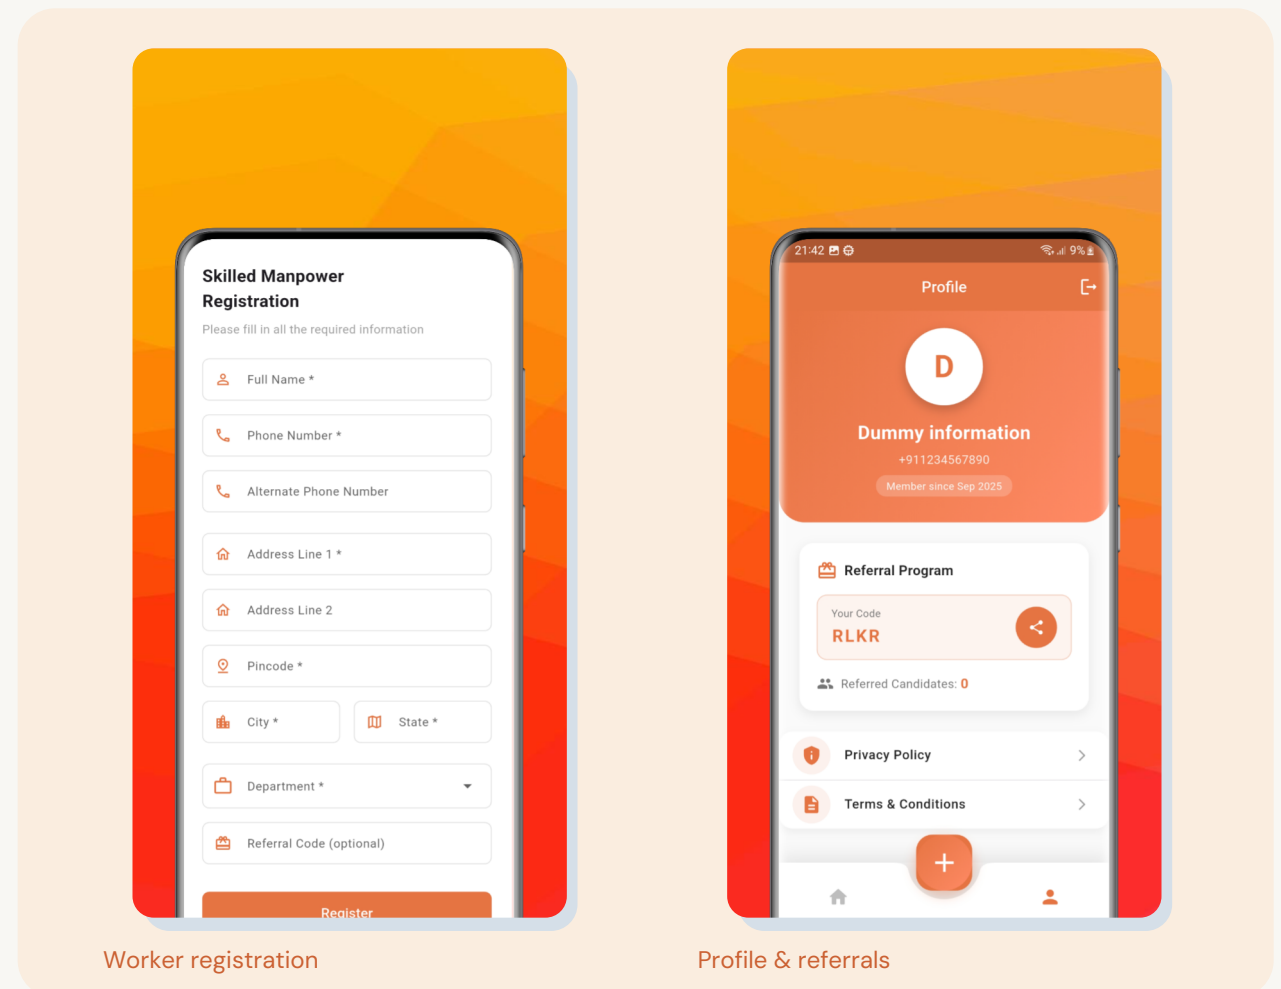

Phone verification and profile management create a straightforward registration flow.

Enable network referrals

Referral-code sharing through WhatsApp and real-time data synchronisation support participation.

PURPOSE

Make workforce registration and referral sharing easier to complete from a phone.

Flutter

Everyday thoughtfulness. Made easier.

Pookie4U helps couples bring consistency to their relationships through daily actions, thoughtful messages, gift suggestions and reminders.

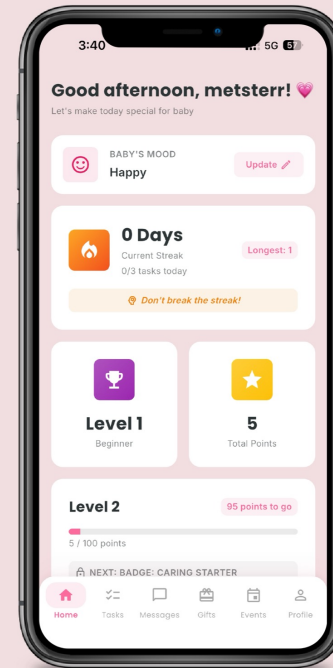

- Support daily connection
Love tasks, ready-to-send messages and mood-based suggestions make thoughtful gestures easier.
- Remember meaningful moments
Gift ideas and event reminders help users plan for birthdays, anniversaries and other occasions.

PURPOSE

Turn everyday relationship intentions into small, practical actions users can return to.

04 / DELIVERY APPROACH

Clarity at every stage.

A shared scope, visible progress and review points help keep the project aligned with your business.

01 Discover

Understand your users, business goals, existing systems and product priorities.

Output: requirements & priorities

02 Define

Agree the feature scope, milestones, dependencies and delivery responsibilities.

Output: delivery plan

03 Design

Map core journeys and develop a visual direction for review and refinement.

Output: approved screens & flows

04 Develop

Build in manageable milestones, connect integrations and demonstrate progress.

Output: working review builds

05 Validate

Review key user journeys, device behaviour, edge cases and release readiness.

Output: tested release candidate

06 Launch & improve

Support submission, handover and the next cycle of fixes or improvements.

Output: release & next-step backlog

05 / YOUR NEXT PROJECT

A practical partnership from day one.

We can help you launch a new mobile product, extend an existing team or improve an app already in use.

01

Project-based development

A defined product scope with agreed milestones, review points and deliverables.

02

Dedicated development support

Flutter and engineering support that fits into your existing product workflow.

03

Maintenance & improvements

Prioritised bug fixes, feature updates and continued product refinement.

LET'S BUILD YOUR NEXT CHAPTER.

Tell us what you want to create.

Share your idea, target users, must-have features and preferred timeline. We can discuss the scope and shape a practical next step together.
